

Engineering Supply List

Mrs. Shepherd

2021-22

A Windows laptop computer that allows software to be loaded onto it – not just run from the cloud. We will be doing 3D design that requires installation onto a computer. Most software is available for MACs but runs differently, so although students may choose to bring a MAC the instructor may not be able to assist students with that version of the software.

*Students who do not have a personal laptop may also choose to check one out from Menard to use for the duration of the school year. Please contact the school to fill out the appropriate paperwork.

3 ring binder for storing handouts and taking notes

Loose leaf paper or spiral notebook for taking notes

Pens/pencils

\$30 lab fee to cover 3D printing supplies

If you have any questions, please contact me at tshepherd@holysaviormenard.com
